SUSTAINABLE & FUNCTIONAL WEBBING

ABOUT US

Fairyland Group is one of the global recognized product research and development enterprises specializing in the innovation, production, and distribution of premium hardware components and advanced webbing, belts and suspenders solutions.

Our core offerings encompass premium hardware accessories — including precision-crafted buckles, clasps and fasteners — as well as advanced webbing products designed for applications in fashion, outdoor gear, automotive manufacturing, luggage, and industrial equipment.

Our vertically integrated supply chain and state-of-the-art facilities ensure seamless customization, rapid prototyping, and scalable production to meet the evolving needs of clients worldwide. By fostering collaborative partnerships and maintaining a customer-first ethos, Fairyland Group empowers brands to achieve competitive differentiation. With a global network of subsidiaries and a forward-thinking team, we continue to redefine industry benchmarks while supporting clients at every stage of their growth journey.

Discover how Fairyland's innovative spirit and technical prowess can transform your next project!

ORGANIC COTTON WEBBING

FEATURES

- Soft and comfortable
- Eco-friendly
- Anti-bacteria
- Anti-static
- Anti-allergic
- Sweat-absorbent and quick drying
- Breathable

BAMBOO FIBER WEBBING

FEATURES

- Eco-friendly
- Soft & comfortable, but strong
- Anti-bacterial
- Moisture wicking and breathable
- UV and wear-resistant

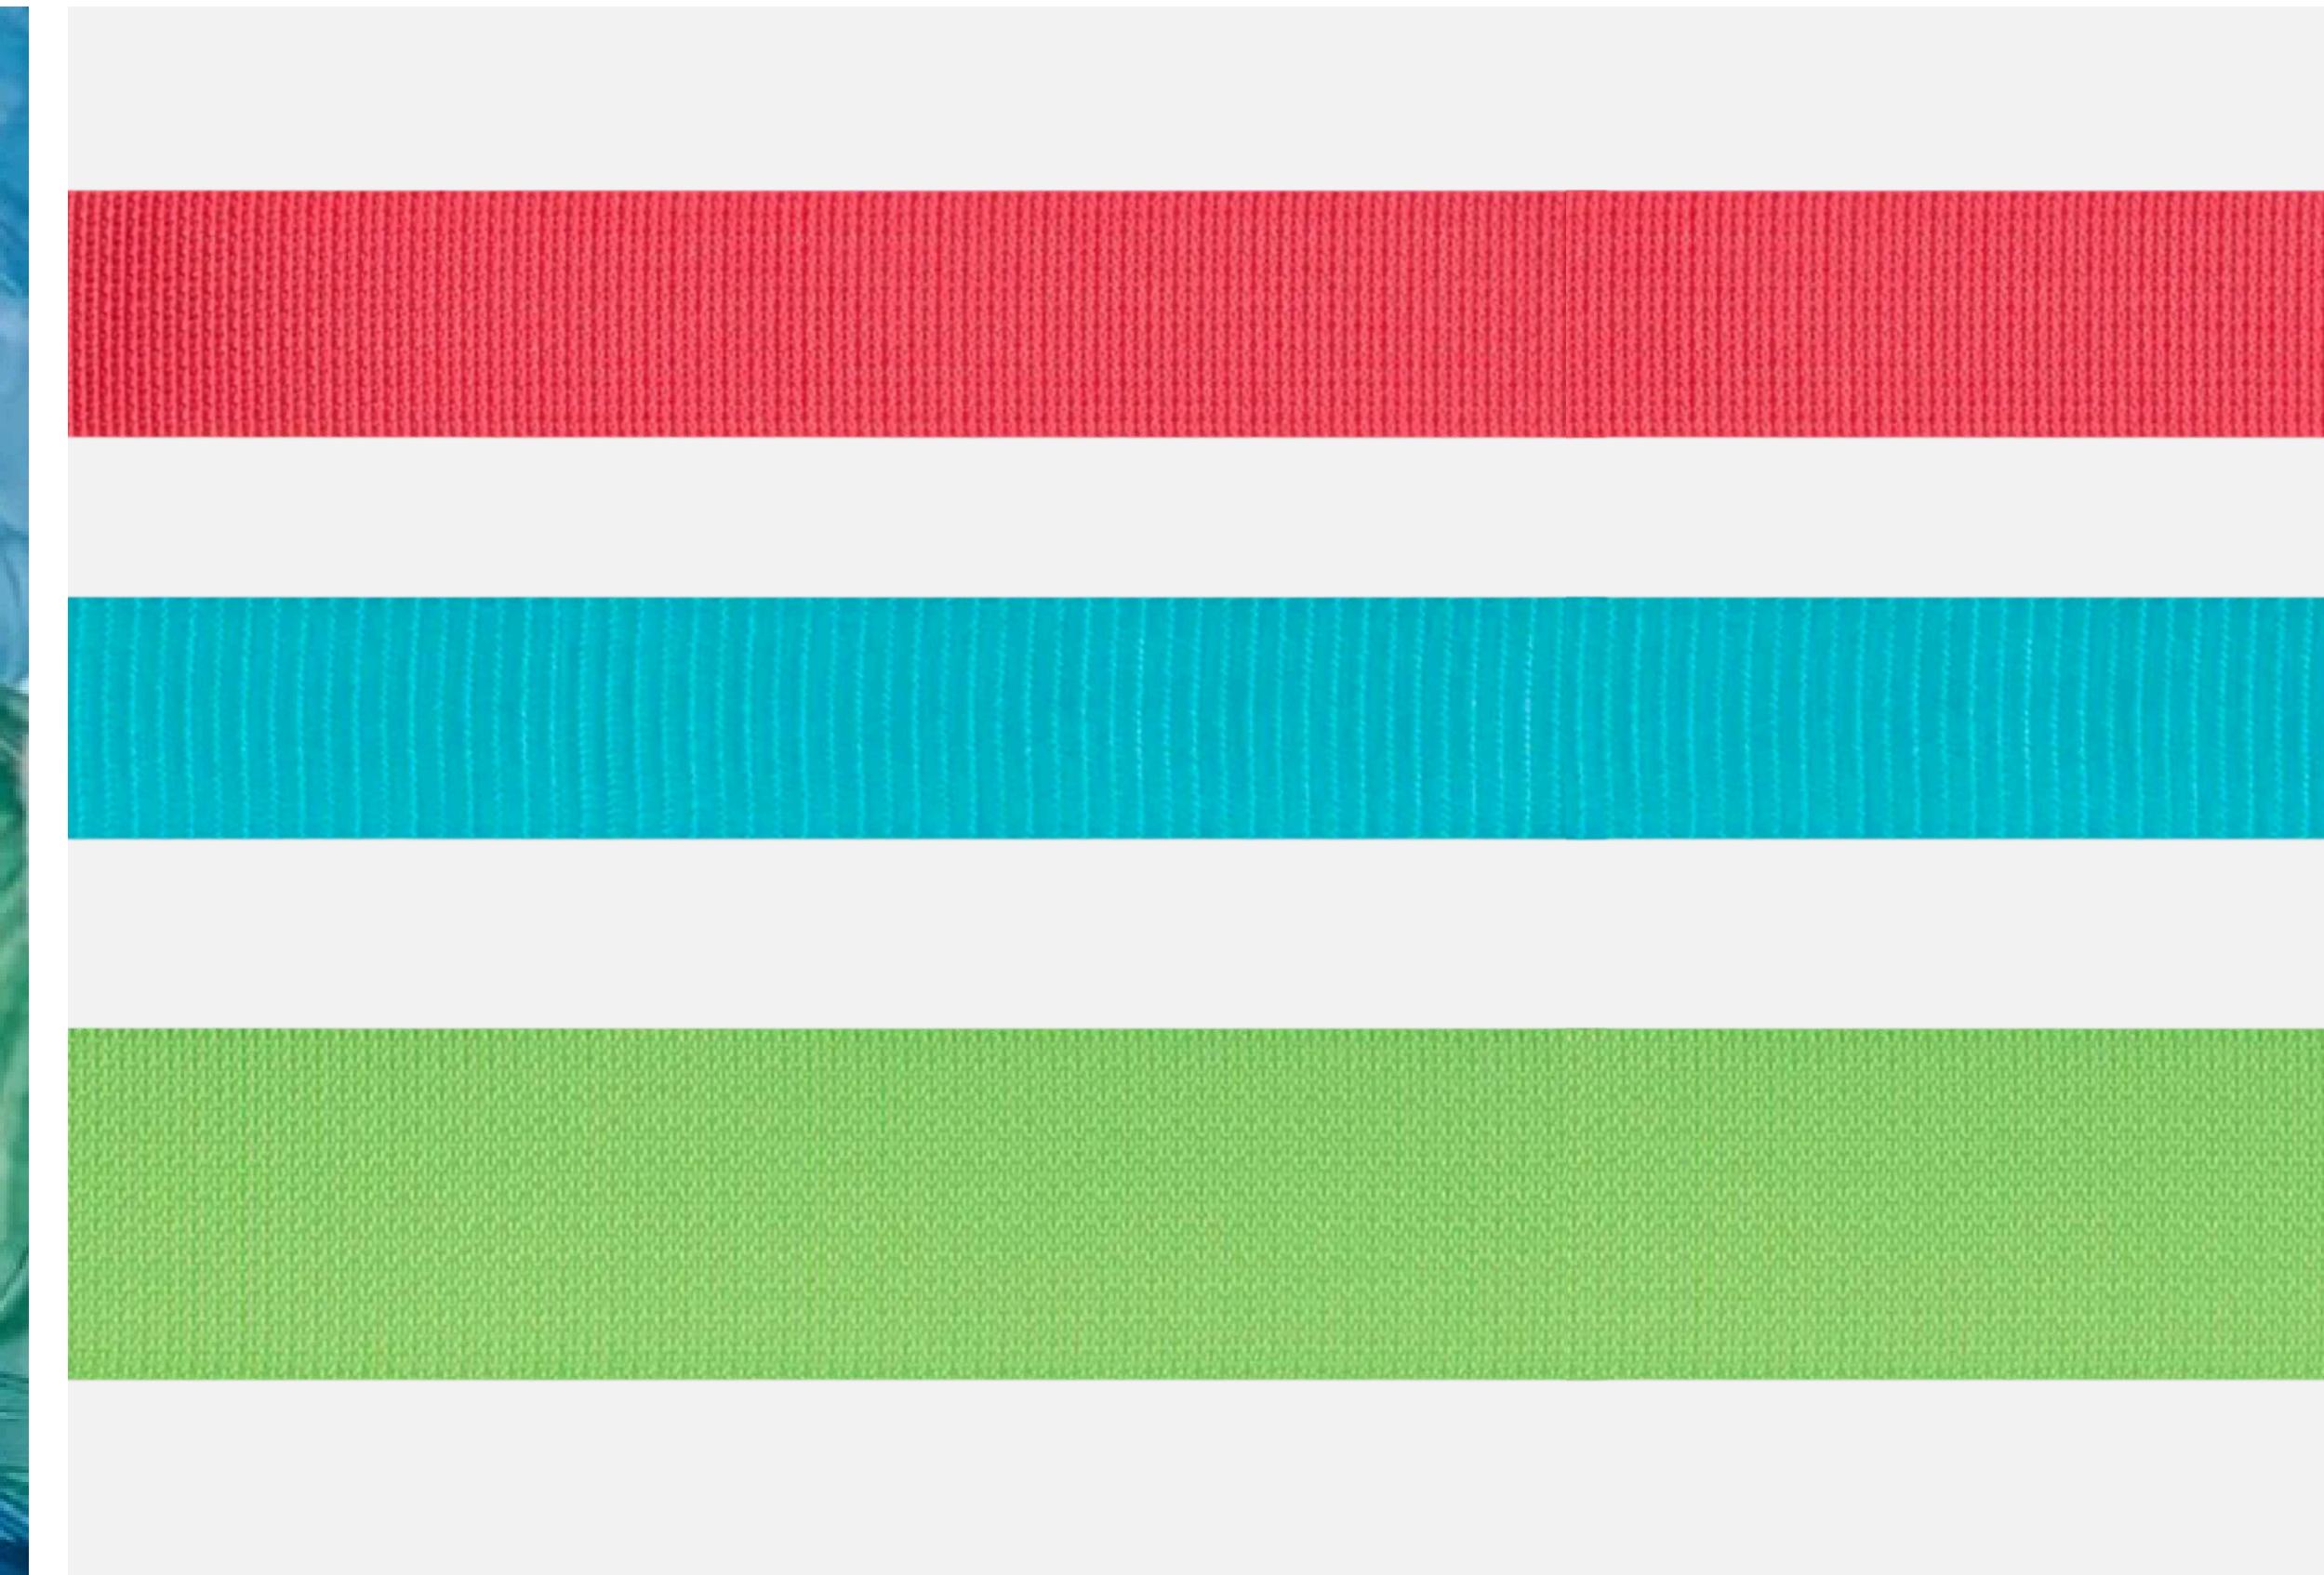

BAMBOO CHARCOAL FIBER WEBBING

Soft and comfortable but strong. Antibacterial, wicking and breathable, Green and eco-friendly. UV-resistant, wear-resistant, fabric resilience.

OCEAN CYCLE WEBBING

FEATURES

- Derived from special treatment of recycled ocean-bound plastic bottles
- Traceable and identifiable
- Eco-friendly and Renewable material
- Special hangtag is available

RECYCLED WEBBING

RECYCLED POLYESTER

FEATURES

- High density & high strength
- Traceable and identifiable
- Eco-friendly
- Wear and abrasion resistant

BIOBASED WEBBING

FEATURES

- Soft and comfortable
- Moisture wicking and breathable
- Eco-friendly with carbon reduction

CATINOIC WEBBING

FEATURES

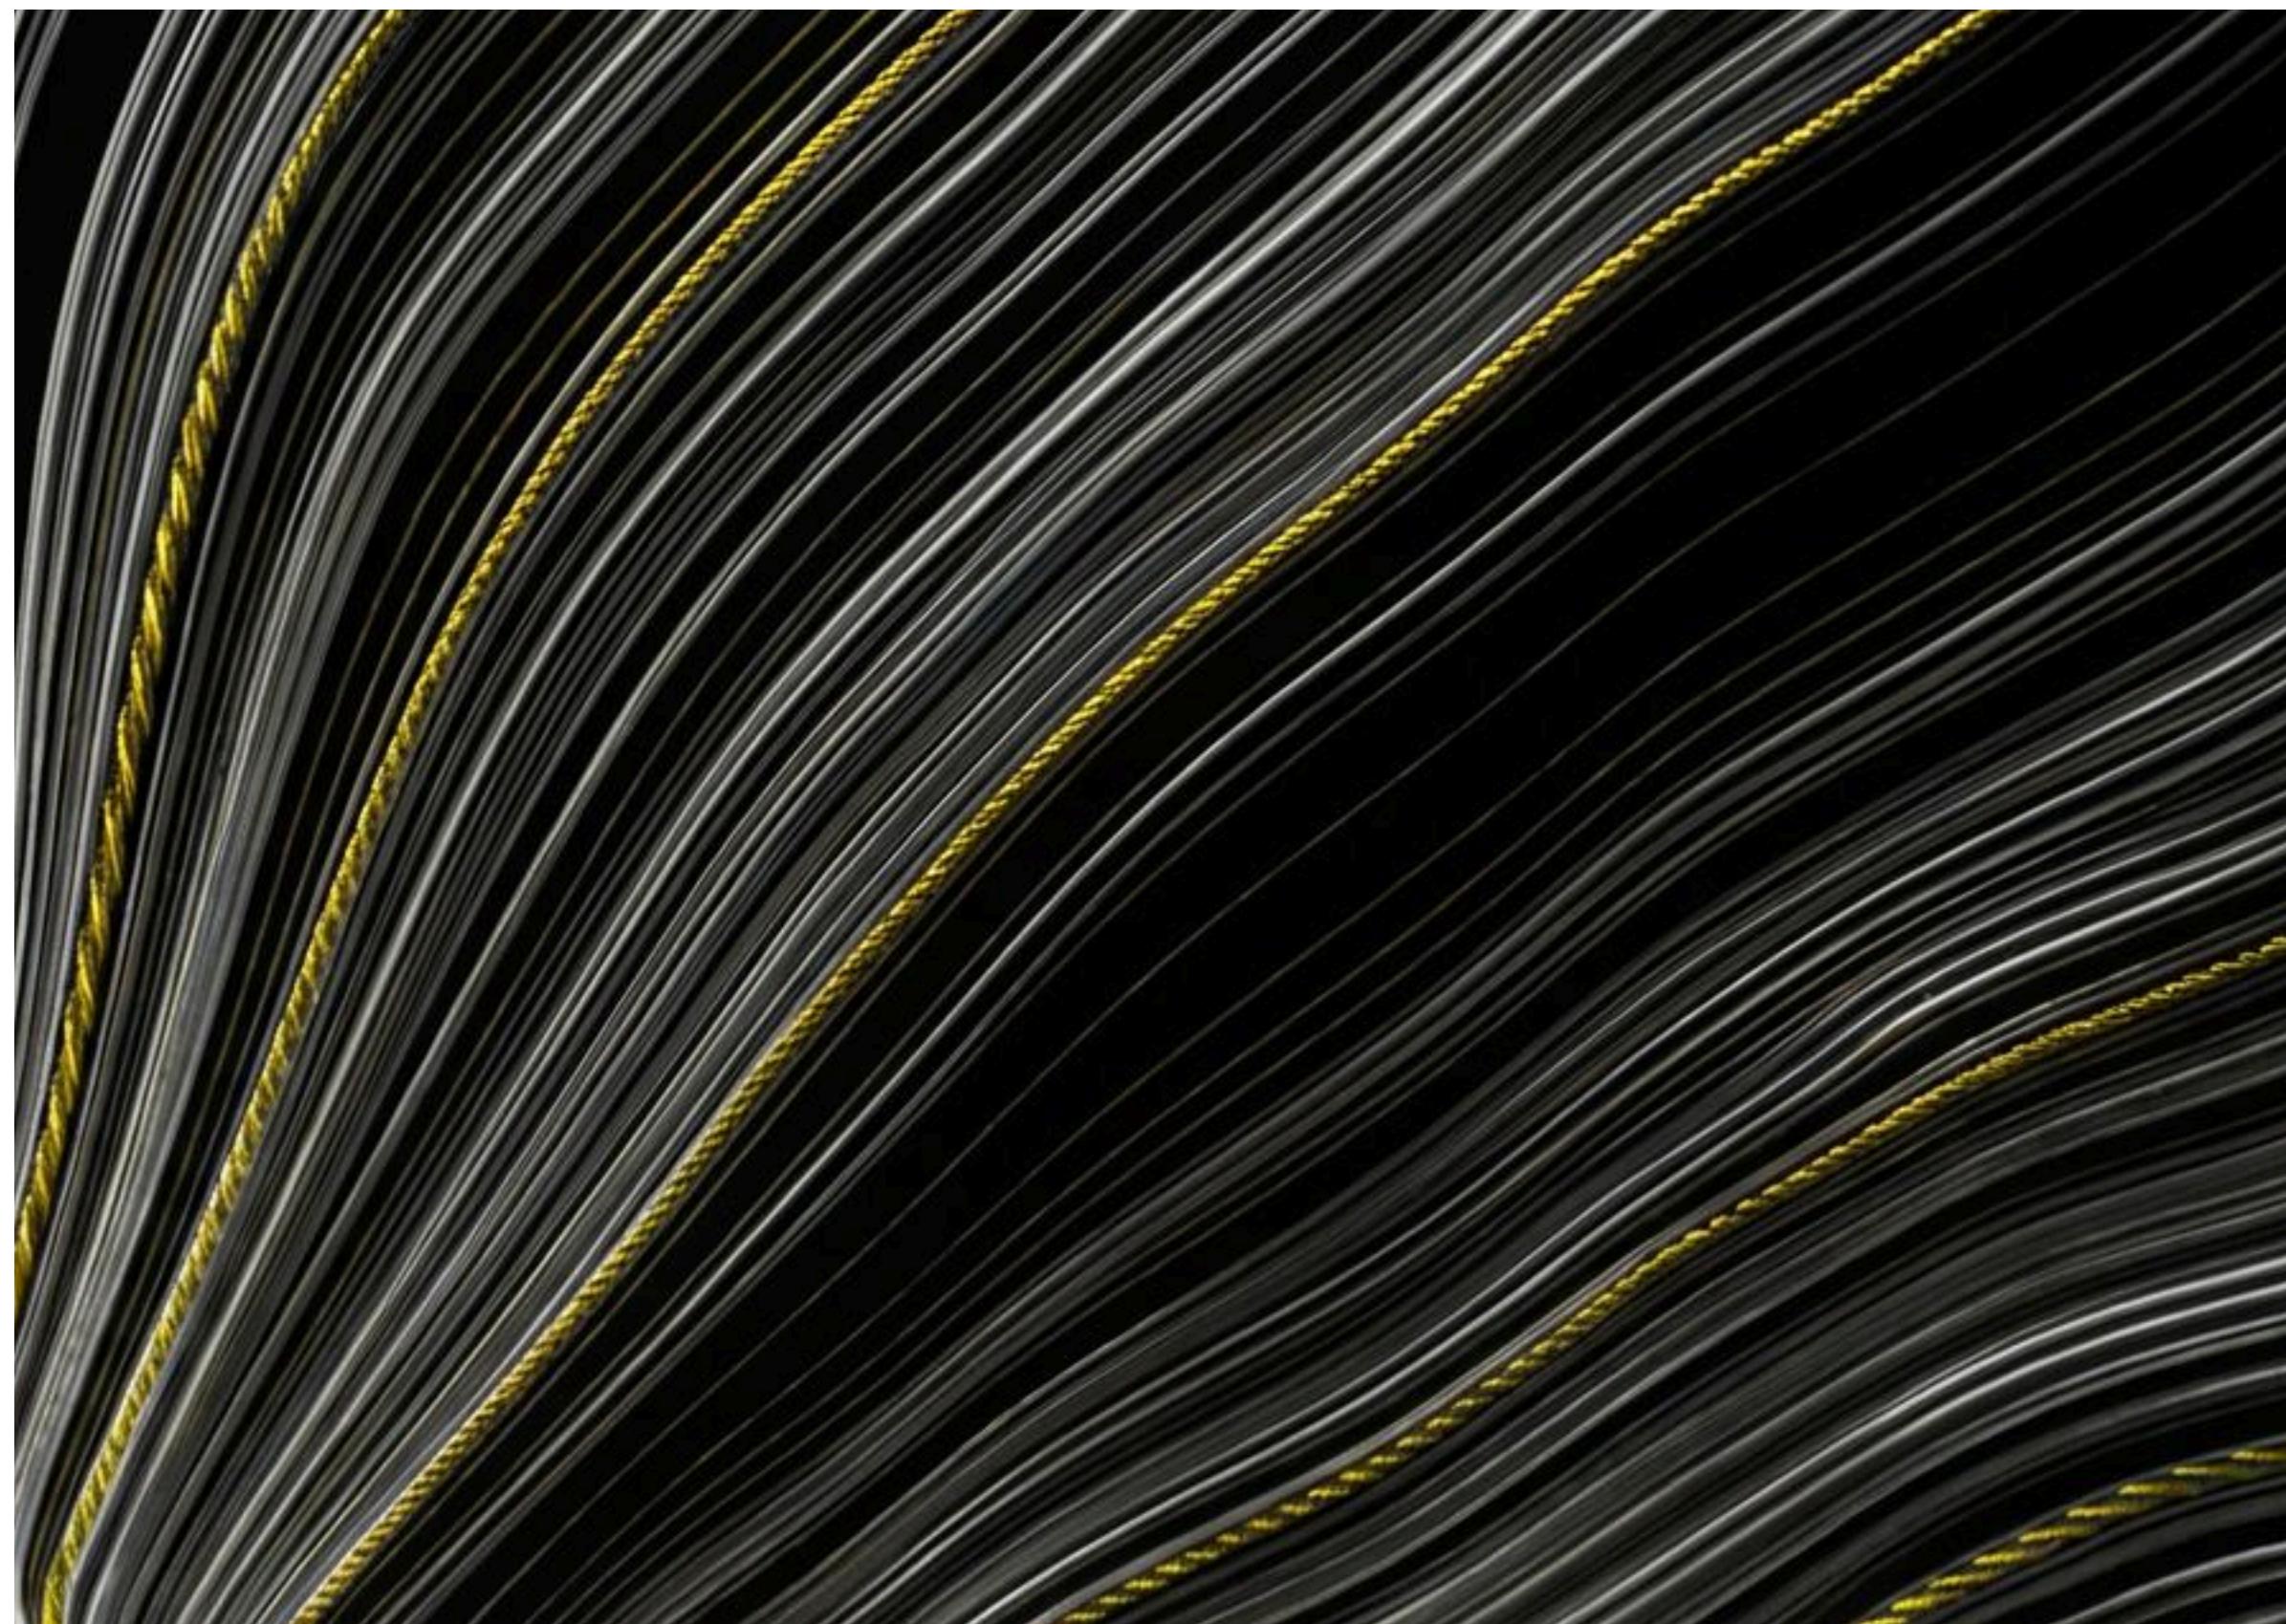

- Soft touch material offers comfortable wearing experience
- Anti-pilling and anti-static
- Moisture wicking and breathable
- Special color combination makes the tape looks fashion and trendy

ANTI-CUTTING WEBBING

FEATURES

- New synthetic fiber with high strength and high temperature resistant properties
- Abrasion and chemical resistance
- Light weight, insulation, anti-aging
- Important materials for military equipment

DYNEEMA WEBBING (UHMWPE)

A high-strength polyethylene fiber, which is twice as strong as carbon fiber and is the highest strength in the world. Smooth surface, not easy to fluff, strong corrosion resistance, good radiation resistance. Application for Body armor, helmet, aerospace materials, sporting goods

MOLLE-FUNCTION WEBBING

FEATURES

- Derived from machine directly, no manpower is involved
- Stable quality and flexible weaving pattern
- High density and tensile strength

HALF-ENCAPSULATION WEBBING

FEATURES

- One side of webbing is encapsulated, it offers an anti-biting effect on pet product application
- Backside of the webbing is soft and comfortable
- Widely use in clothing, backpacks and pet products

MOISTURE WICKING FABRIC WEBBING

FEATURES

- Mixture of imported latex thread and special fiber which consists of silver-based material to offer ant-bacterial and anti-odor function
- Quick dry and moisture wicking
- Soft and comfortable

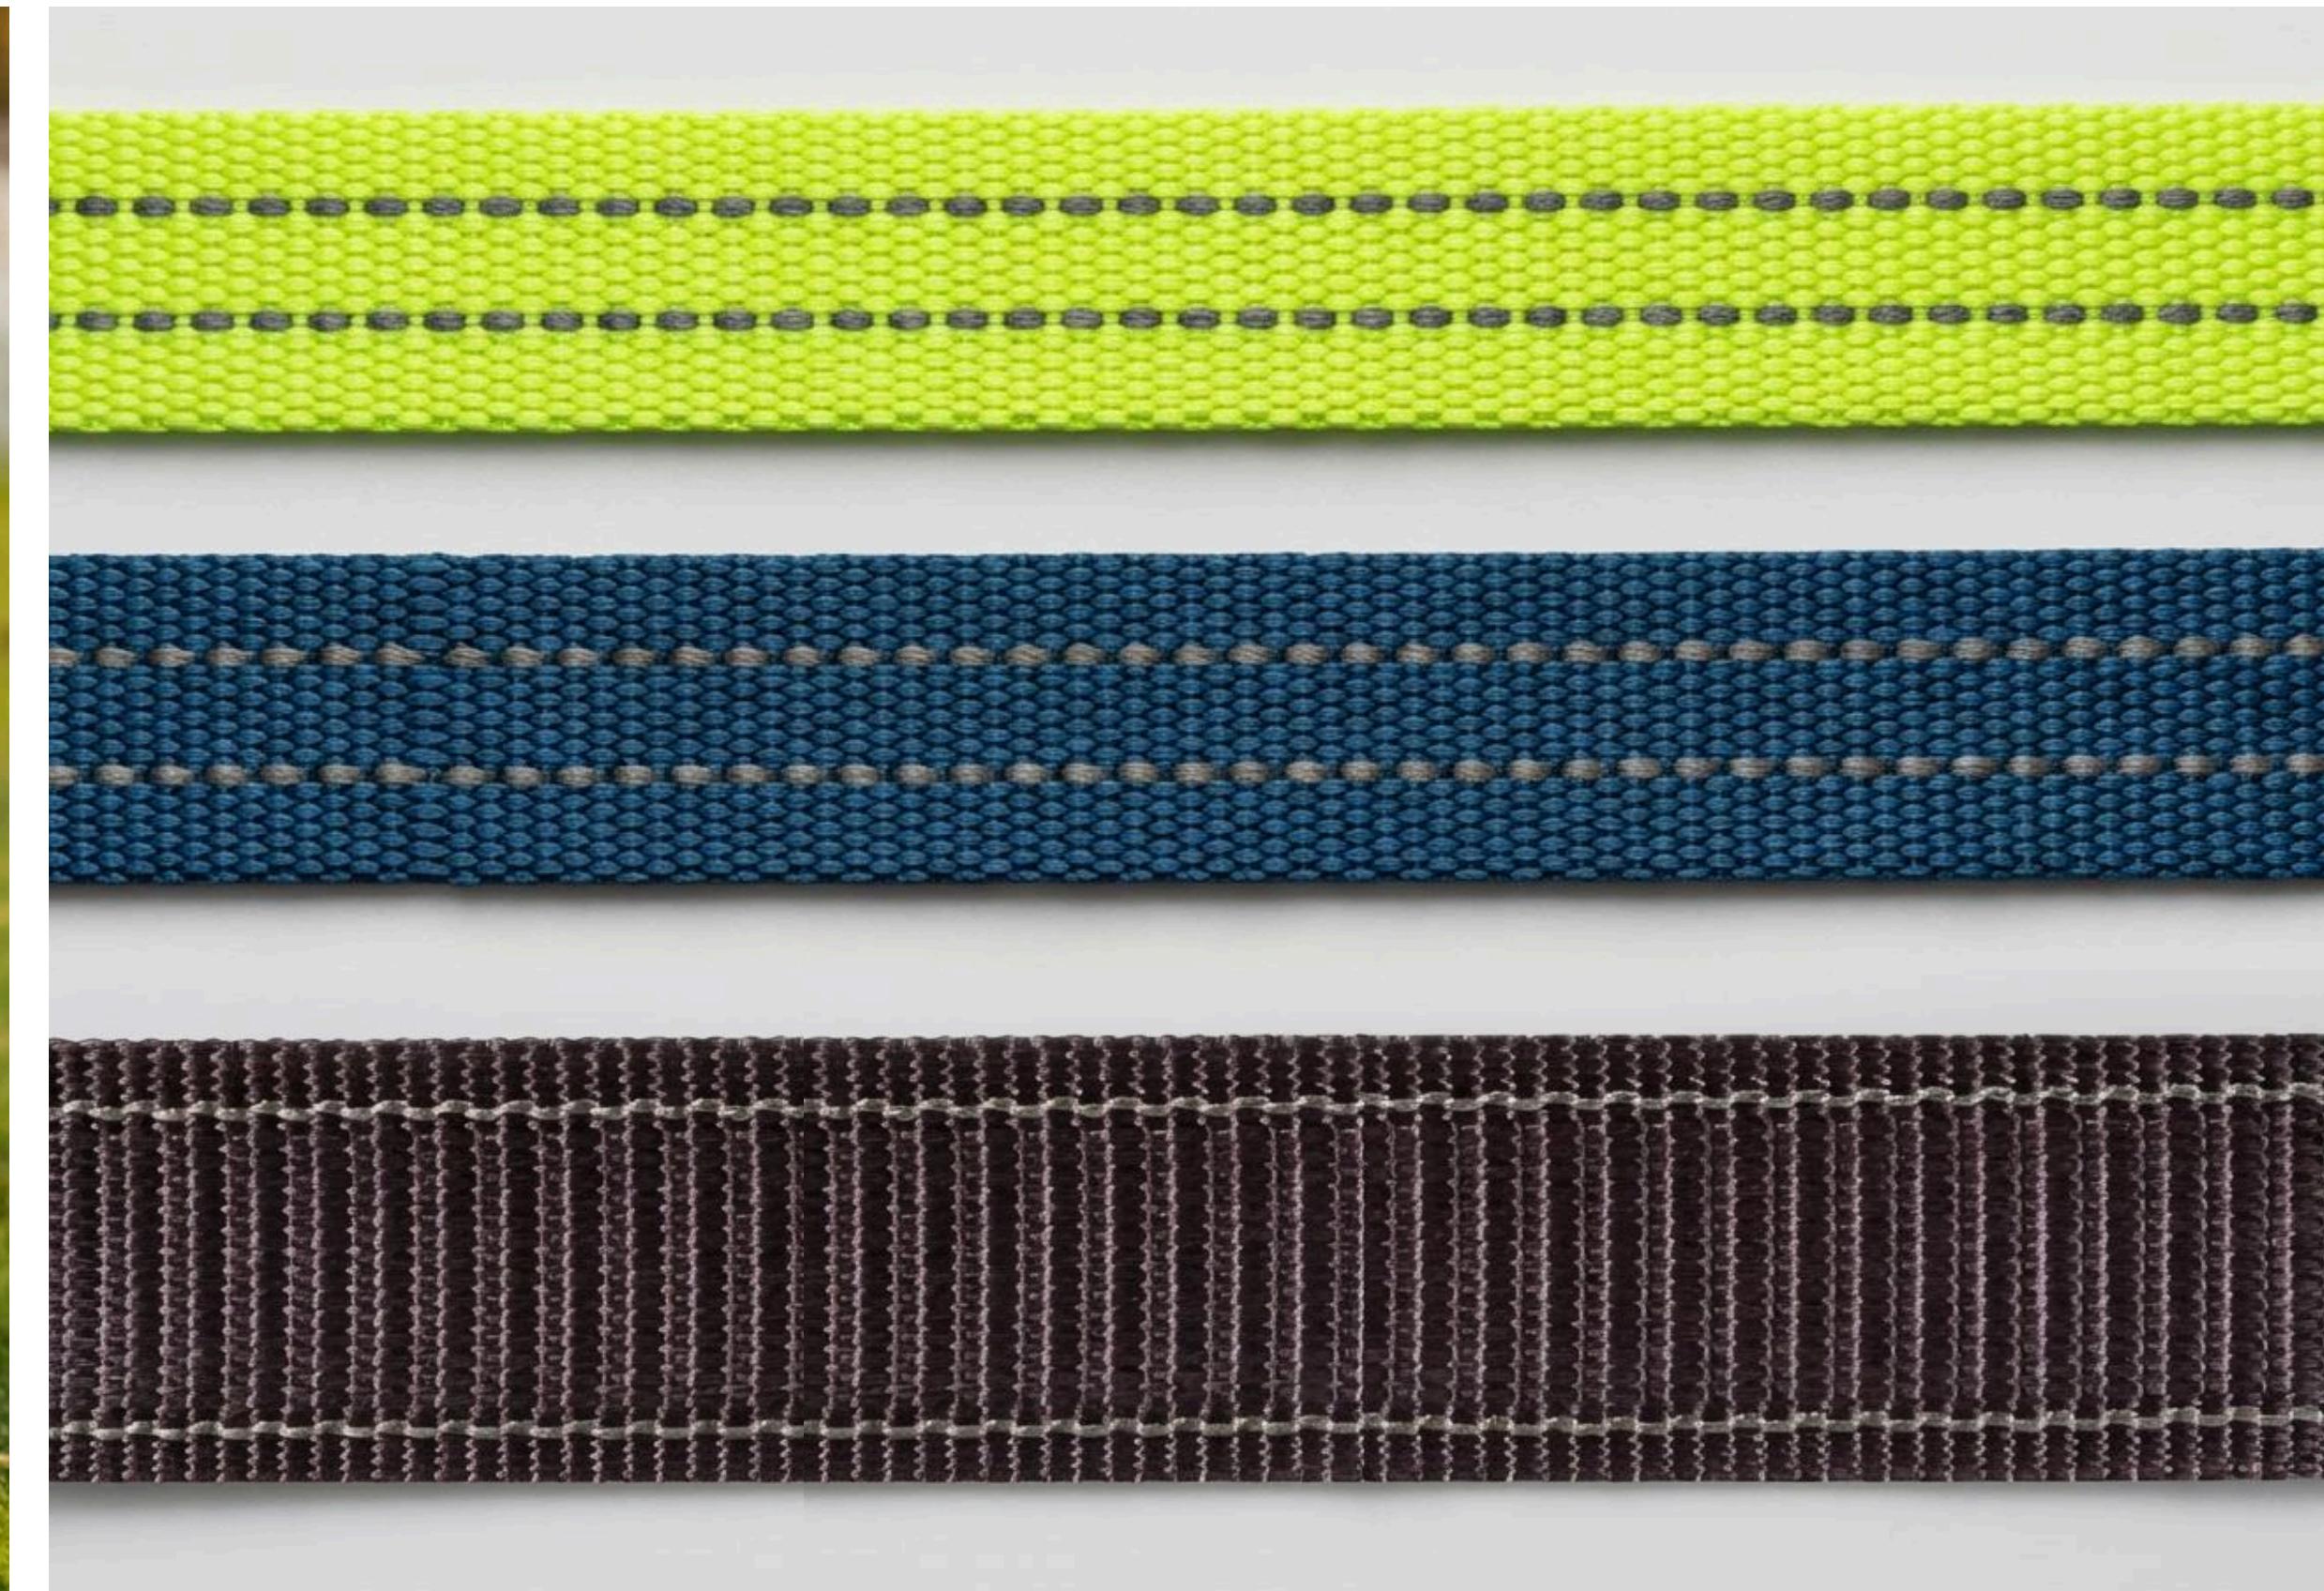

Antibacterial and odor-proof webbing

MATTED NYLON WEBBING

FEATURES

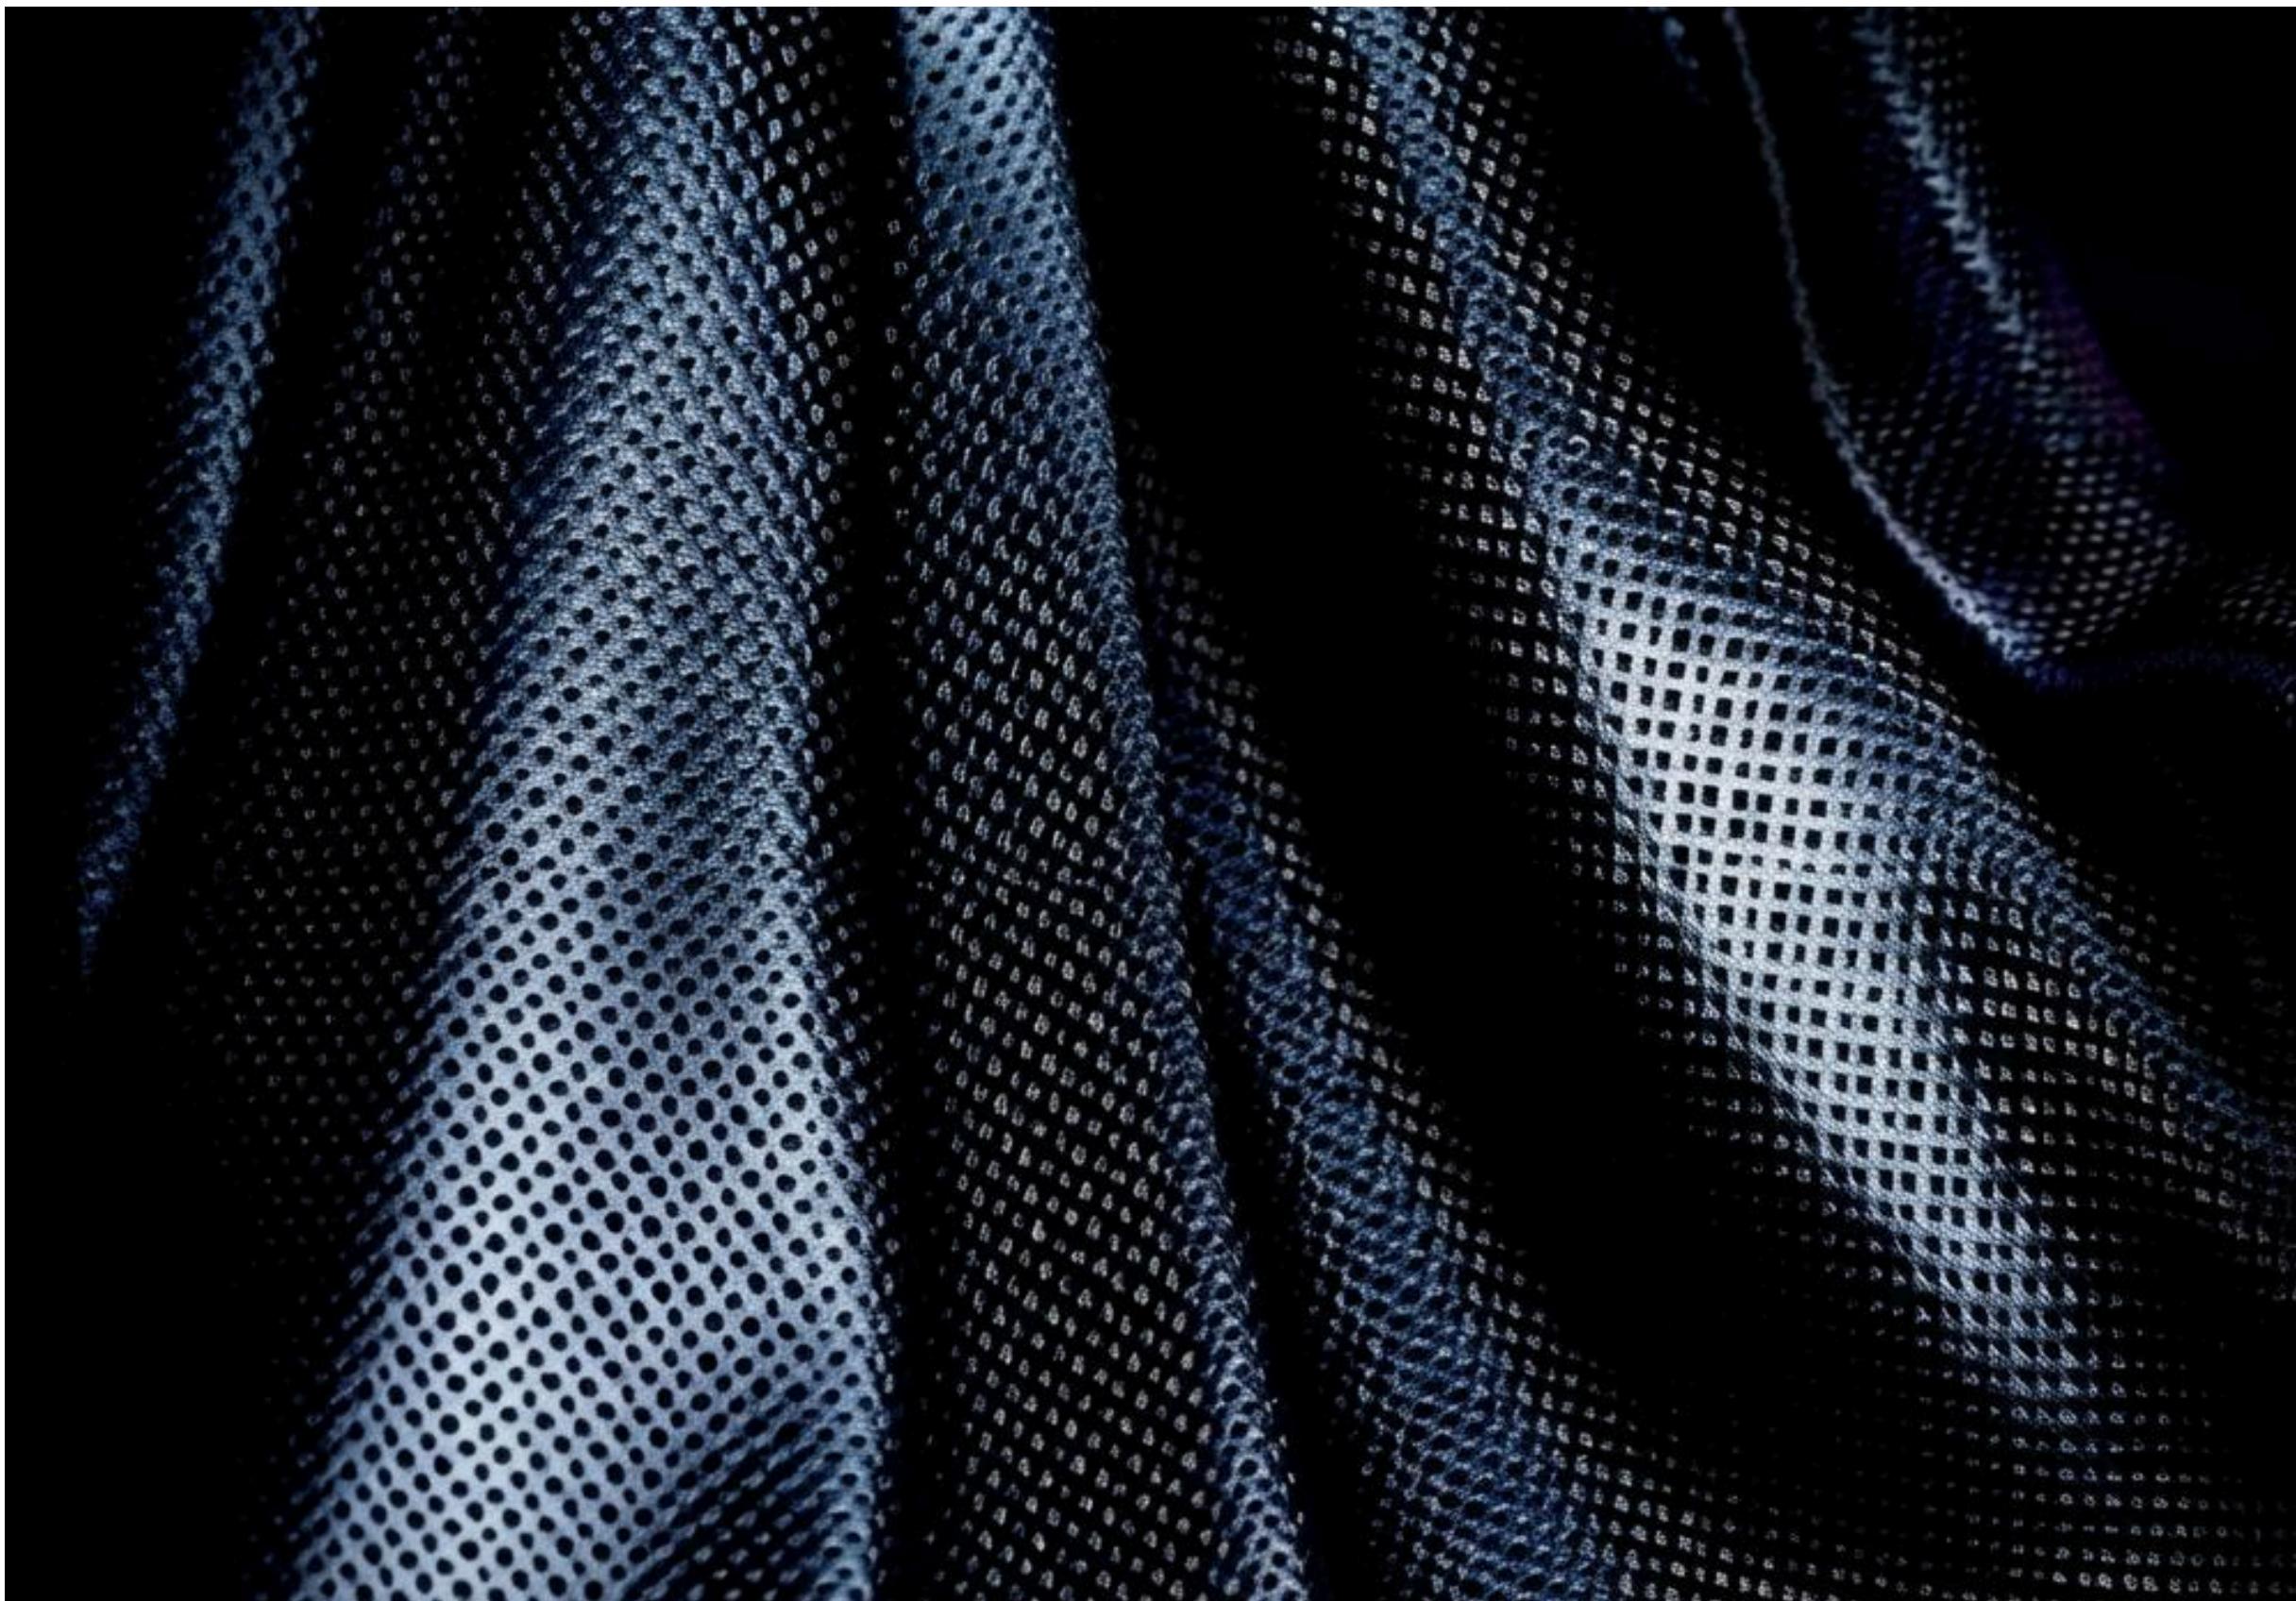

- Relieve eye fatigue
- Soft and comfortable
- High tensile strength

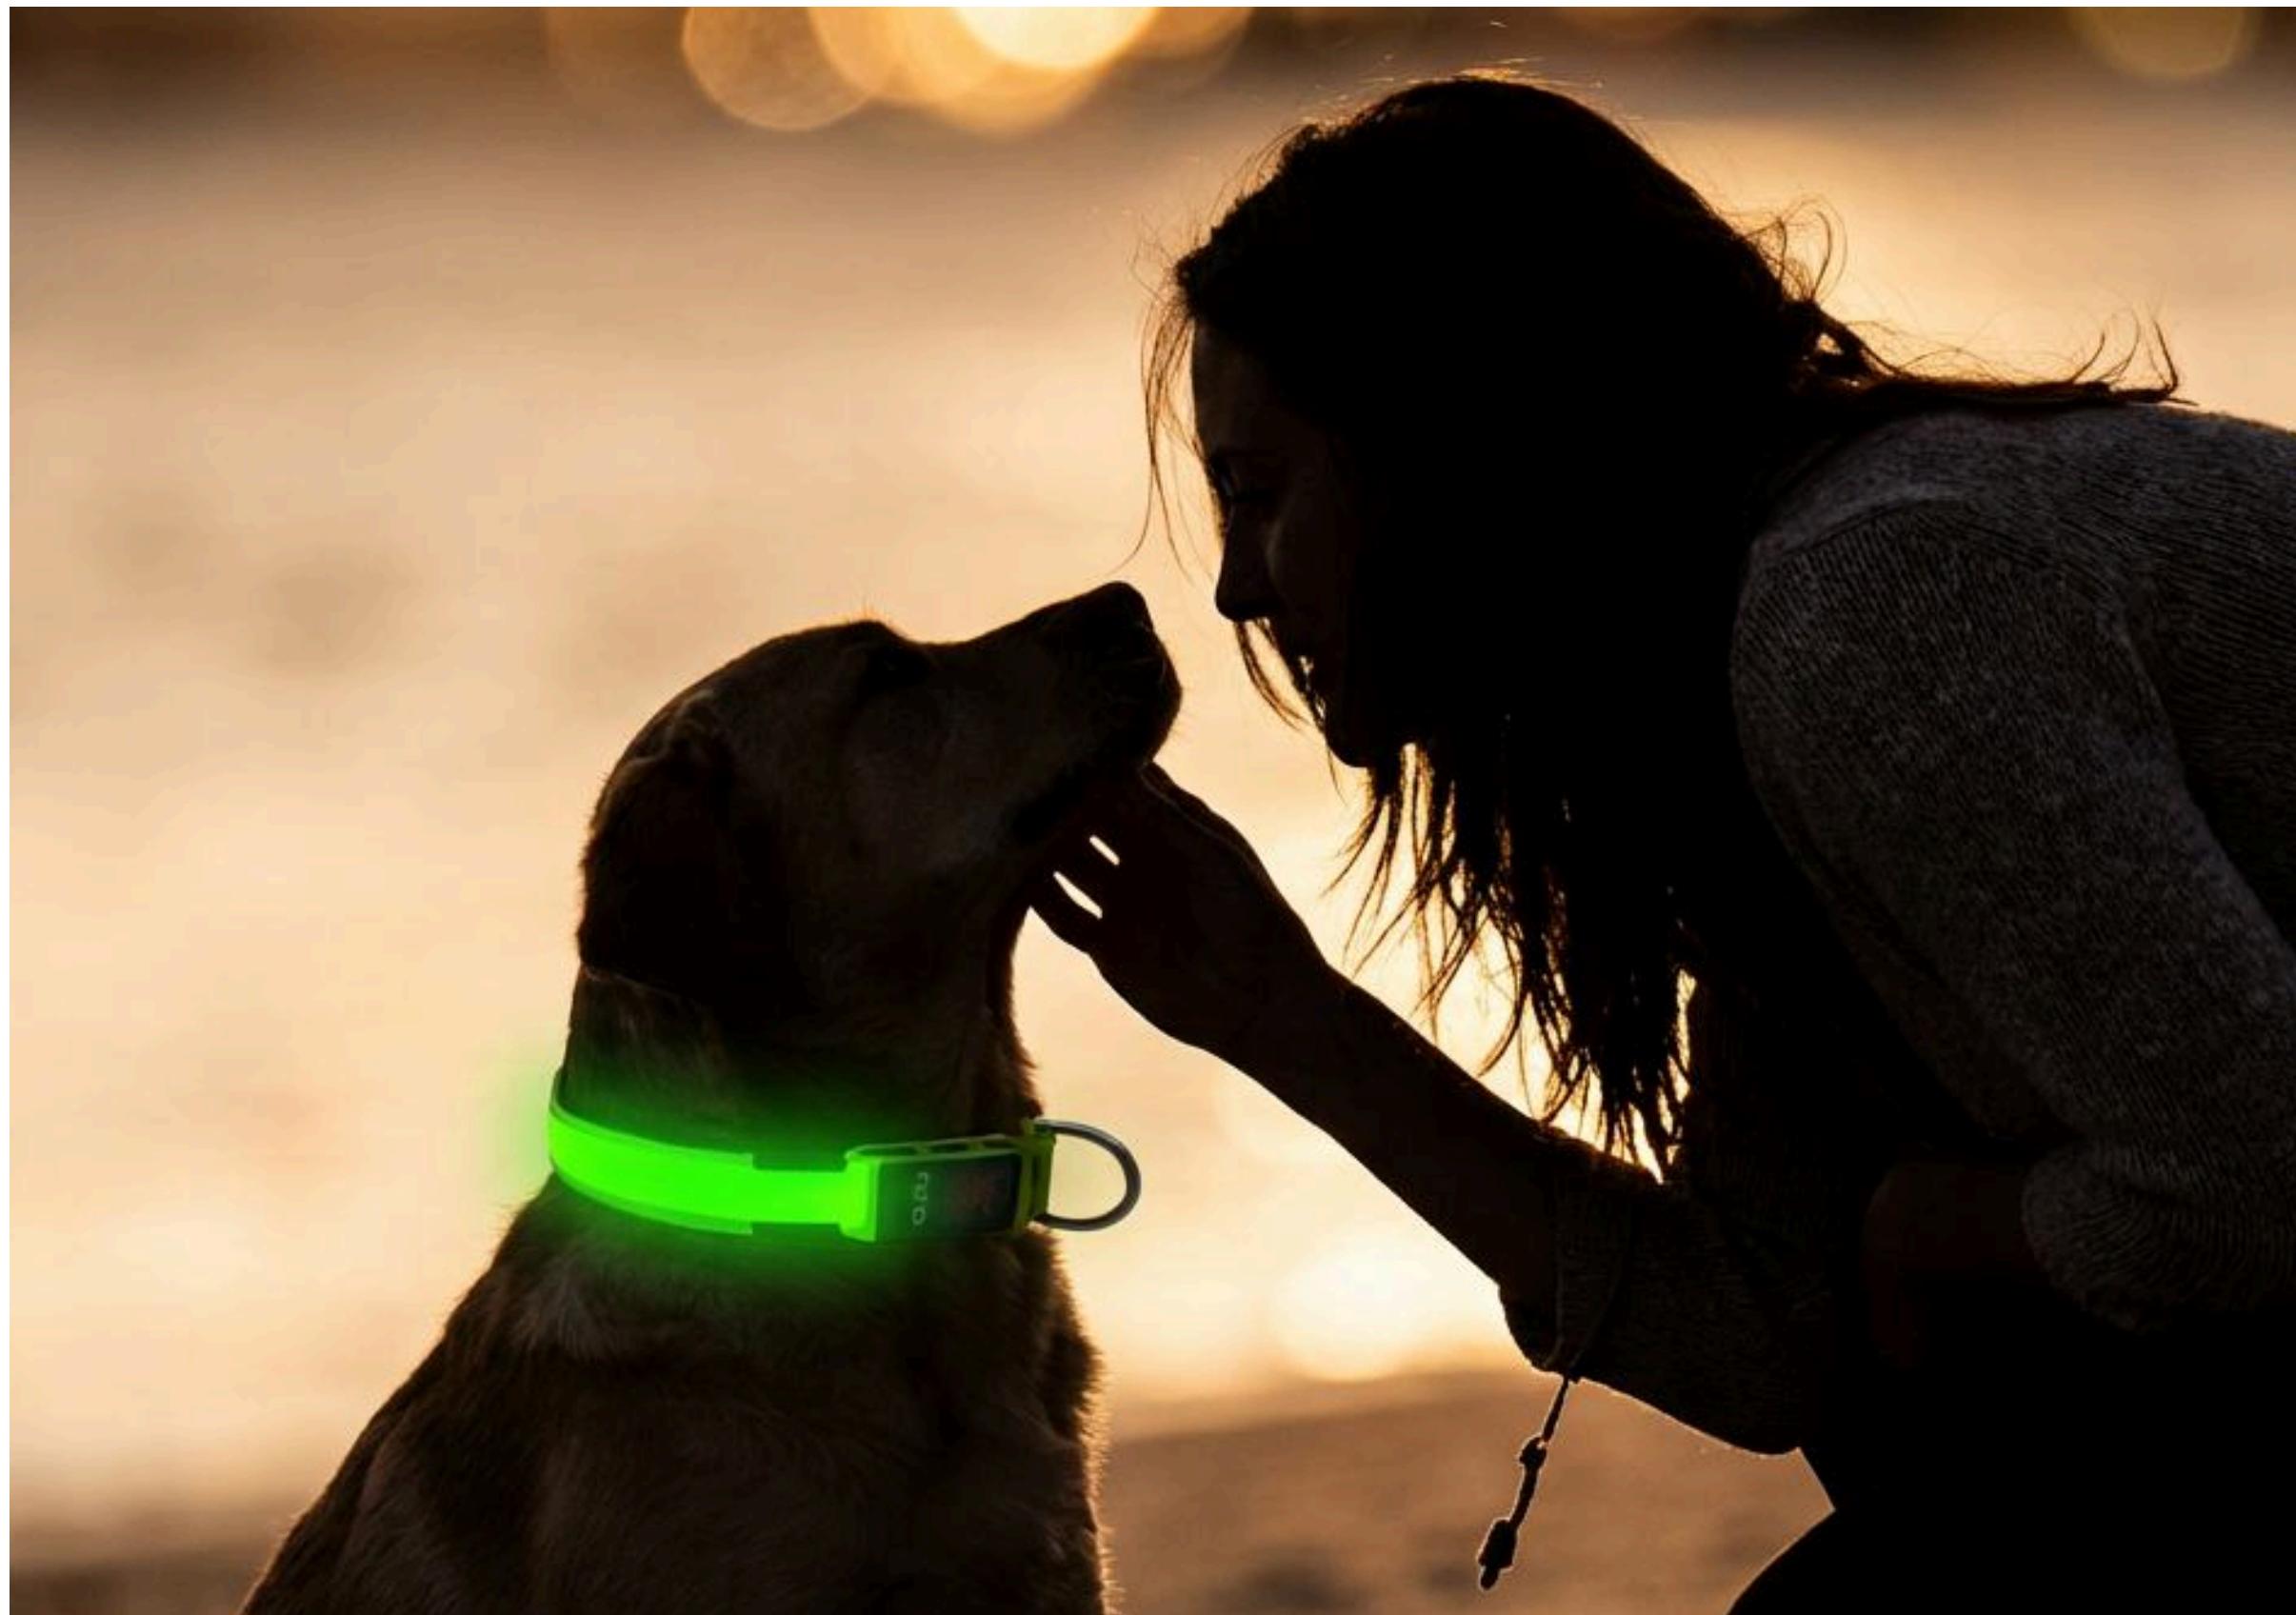

REFLECTIVE NYLON STAR WEBBING

FEATURES

- Metallic brilliance surface
- High visibility at night
- High tensile strength

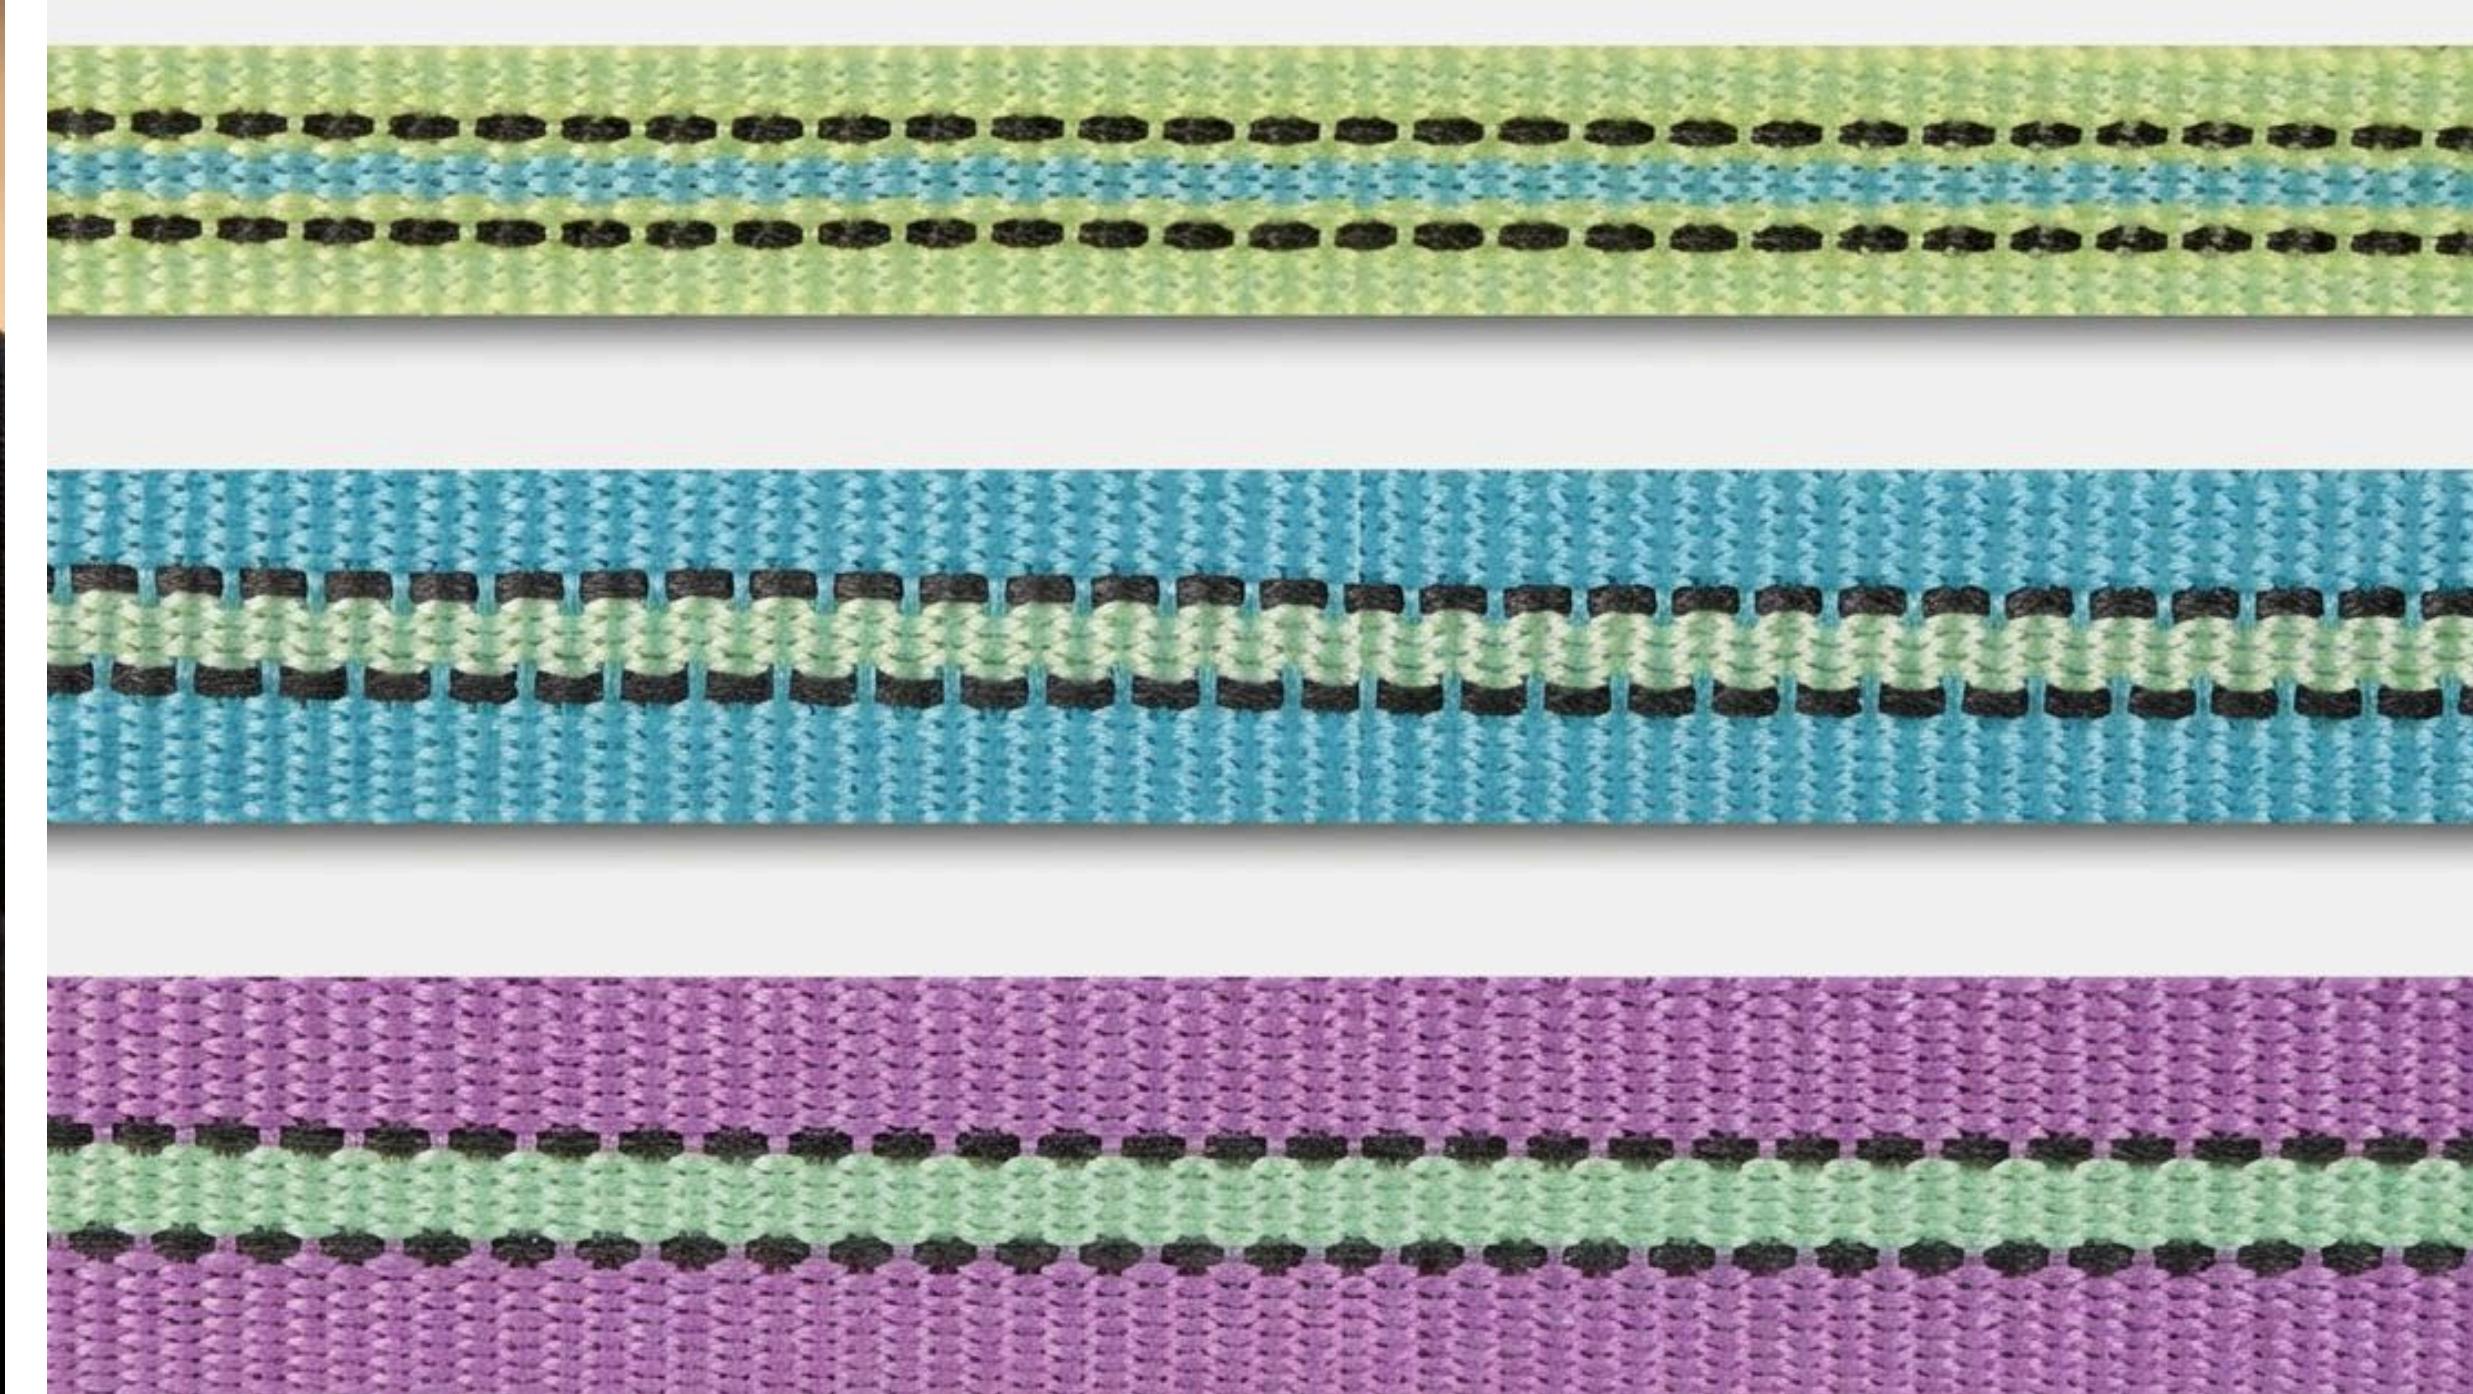

GLOWING IN THE DARK WEBBING

FEATURES

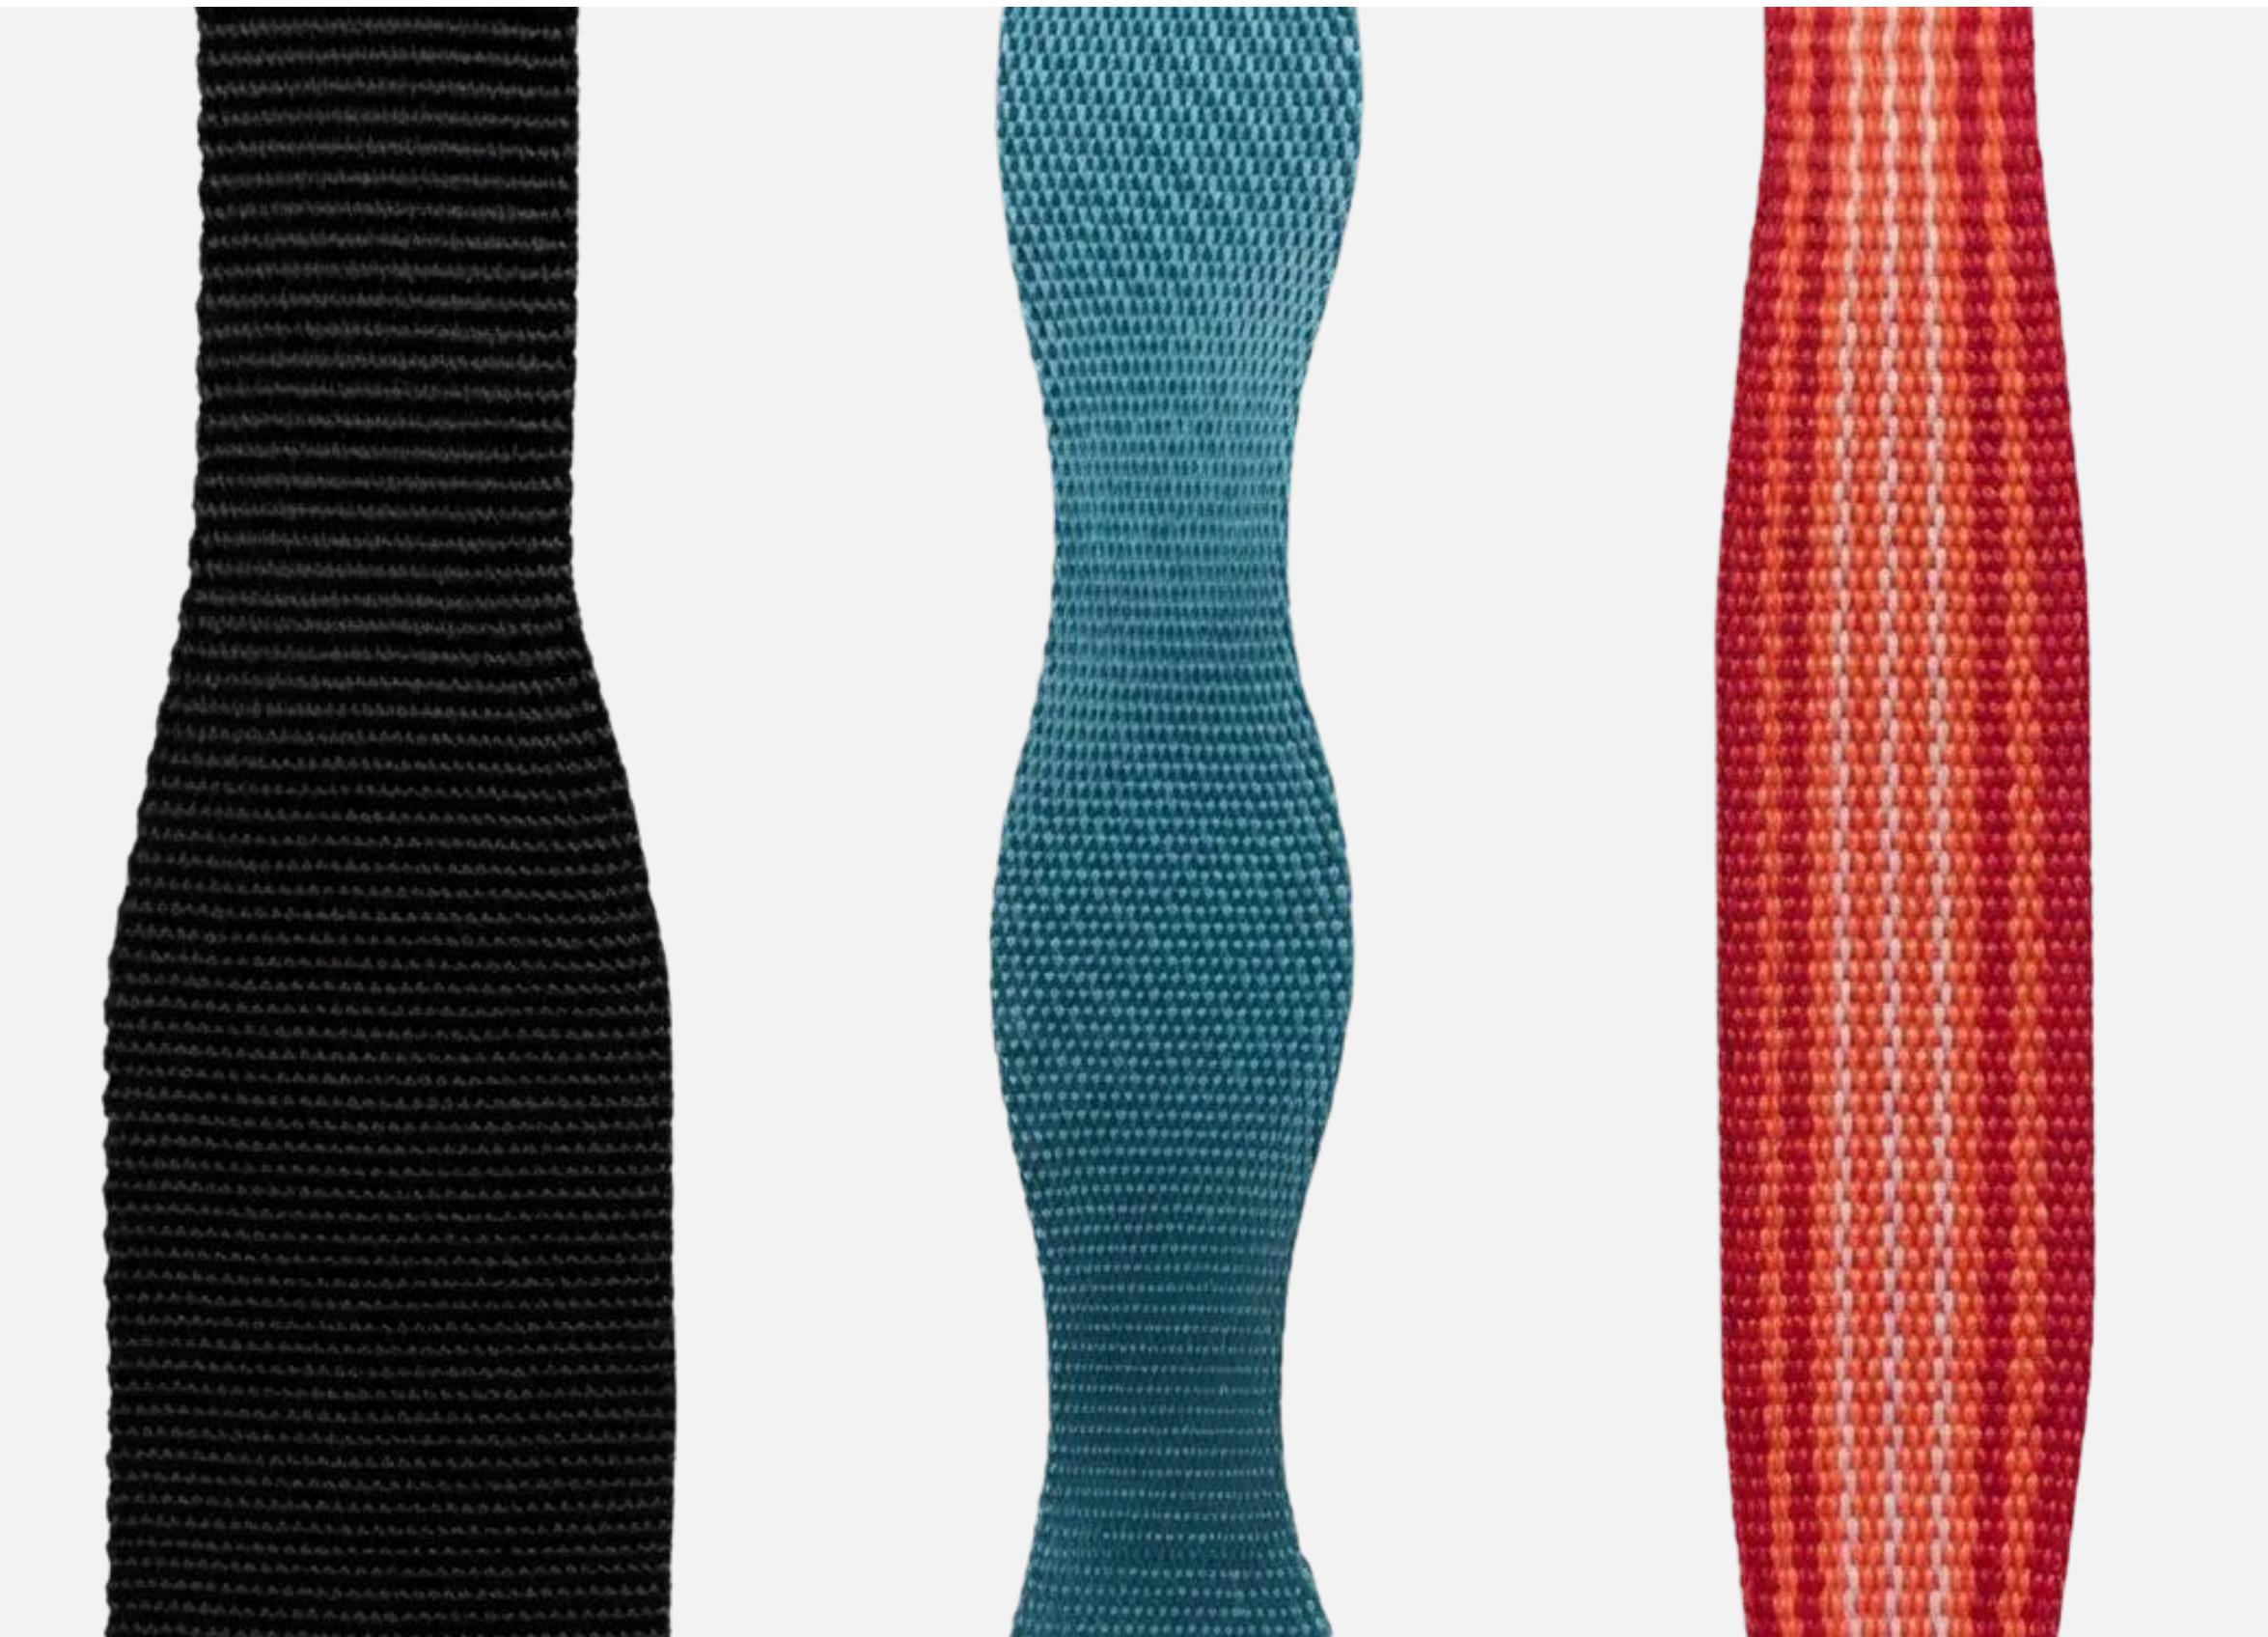

- Mixture of glowing in the dark and reflective yarn
- Functional and high visibility at both day and night time

BROAD AND NARROW WEBBING

FEATURES

- One piece forming technique from advanced weaving machine
- High flexibility in shape and weaving pattern

HANDLE FOR BACKPACK

FEATURES

- Single piece directly from the machine, no extra manpower is needed
- Excellent touch feeling

HIGH DEFINITION JACQUARD WEBBING

FEATURES

- Clear and high-definition jacquard tape from advanced weaving machine
- High density with different color variation
- Double side jacquard effects are available.

WATCH STRAP

FEATURES

- Fashion and trendy
- Comfortable hand feel and wearing experience

HAMMOCK STRAP

FEATURES

- Double layered tape derived from auto weaving machine directly, no extra manpower is involved
- Max. tensile strength of each weaving loop can reach over 400KGS
- Flexible in color combination, logo, loop size and distance

CORDURA MOLLE WEBBING

FEATURES

- Licensing yarn from Cordura
- High tensile strength
- Customized logo, theme and design
- Cordura hangtag is available

CORDURA MOLLE WEBBING

FEATURES

- Licensing yarn from Cordura with special tag available
- Long loop ear webbing construction which provide quick attach and hook function
- Wide application in backpacks, outdoor furniture and workwear products

DOUBLE LAYERS WEBBING

FEATURES

- Double layered tape derived from auto weaving machine directly, no extra manpower is involved
- Max. tensile strength of each weaving loop can reach over 400KGS
- Flexible in color combination, logo, loop size and distance
- New concept for workwear, outdoor hanging and possible industrial use

MULTI-FUNCTIONAL TAPES

FEATURES

- All in one design derived from advanced weaving machine
- Strong buffer system to prevent instantaneous impact force and offer extra tensile strength.
- Double side jacquard effects are available

Y-BAND WITH LARGE OPENING

FEATURES

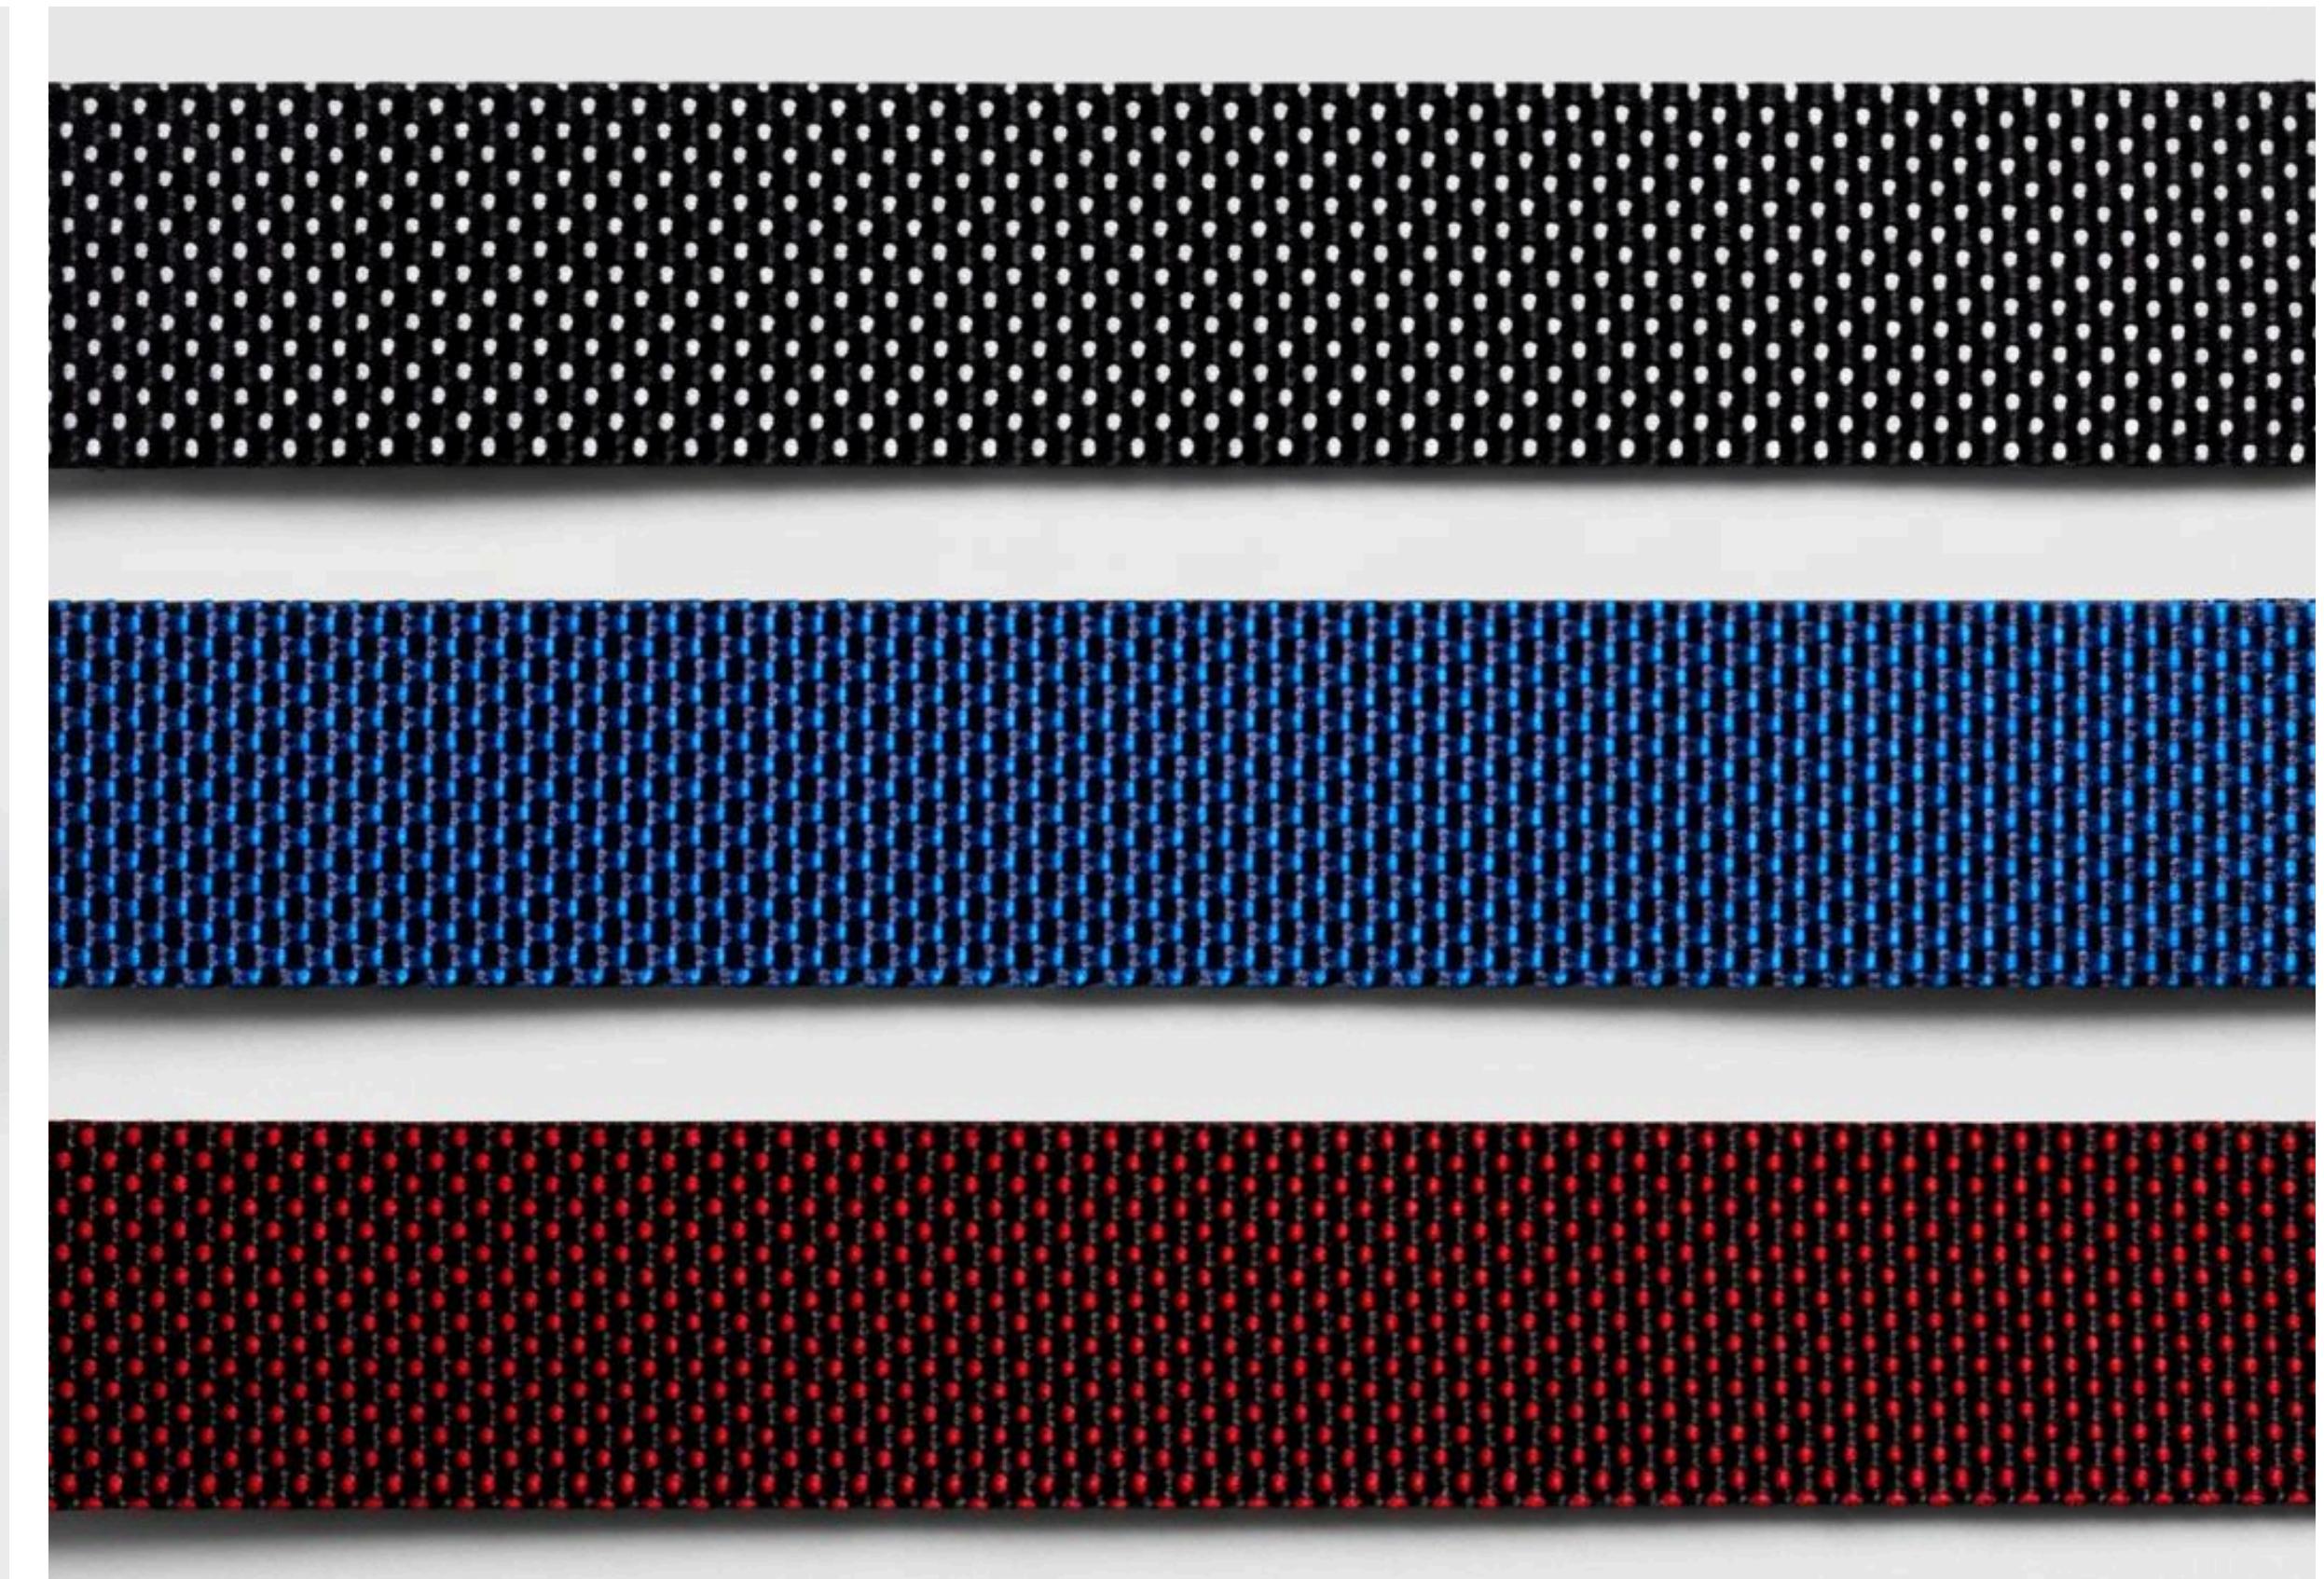

- One-pieces of integrated moulding the opening length and position can be customized

REFLECTIVE NYLON STAR WEBBING

FEATURES

- Metallic brilliance surface
- High visibility at night
- High tensile strength
